a Every candidate set, grouped by tree

Only a leaf order of each tree is shown (ward.D2 clustering, Jaccard, average linkage). Sands alternate between clusters at height 0.85 bold: the cluster's most specific set; ' ' calls of opposite sign; † interaction FDR < 0.05

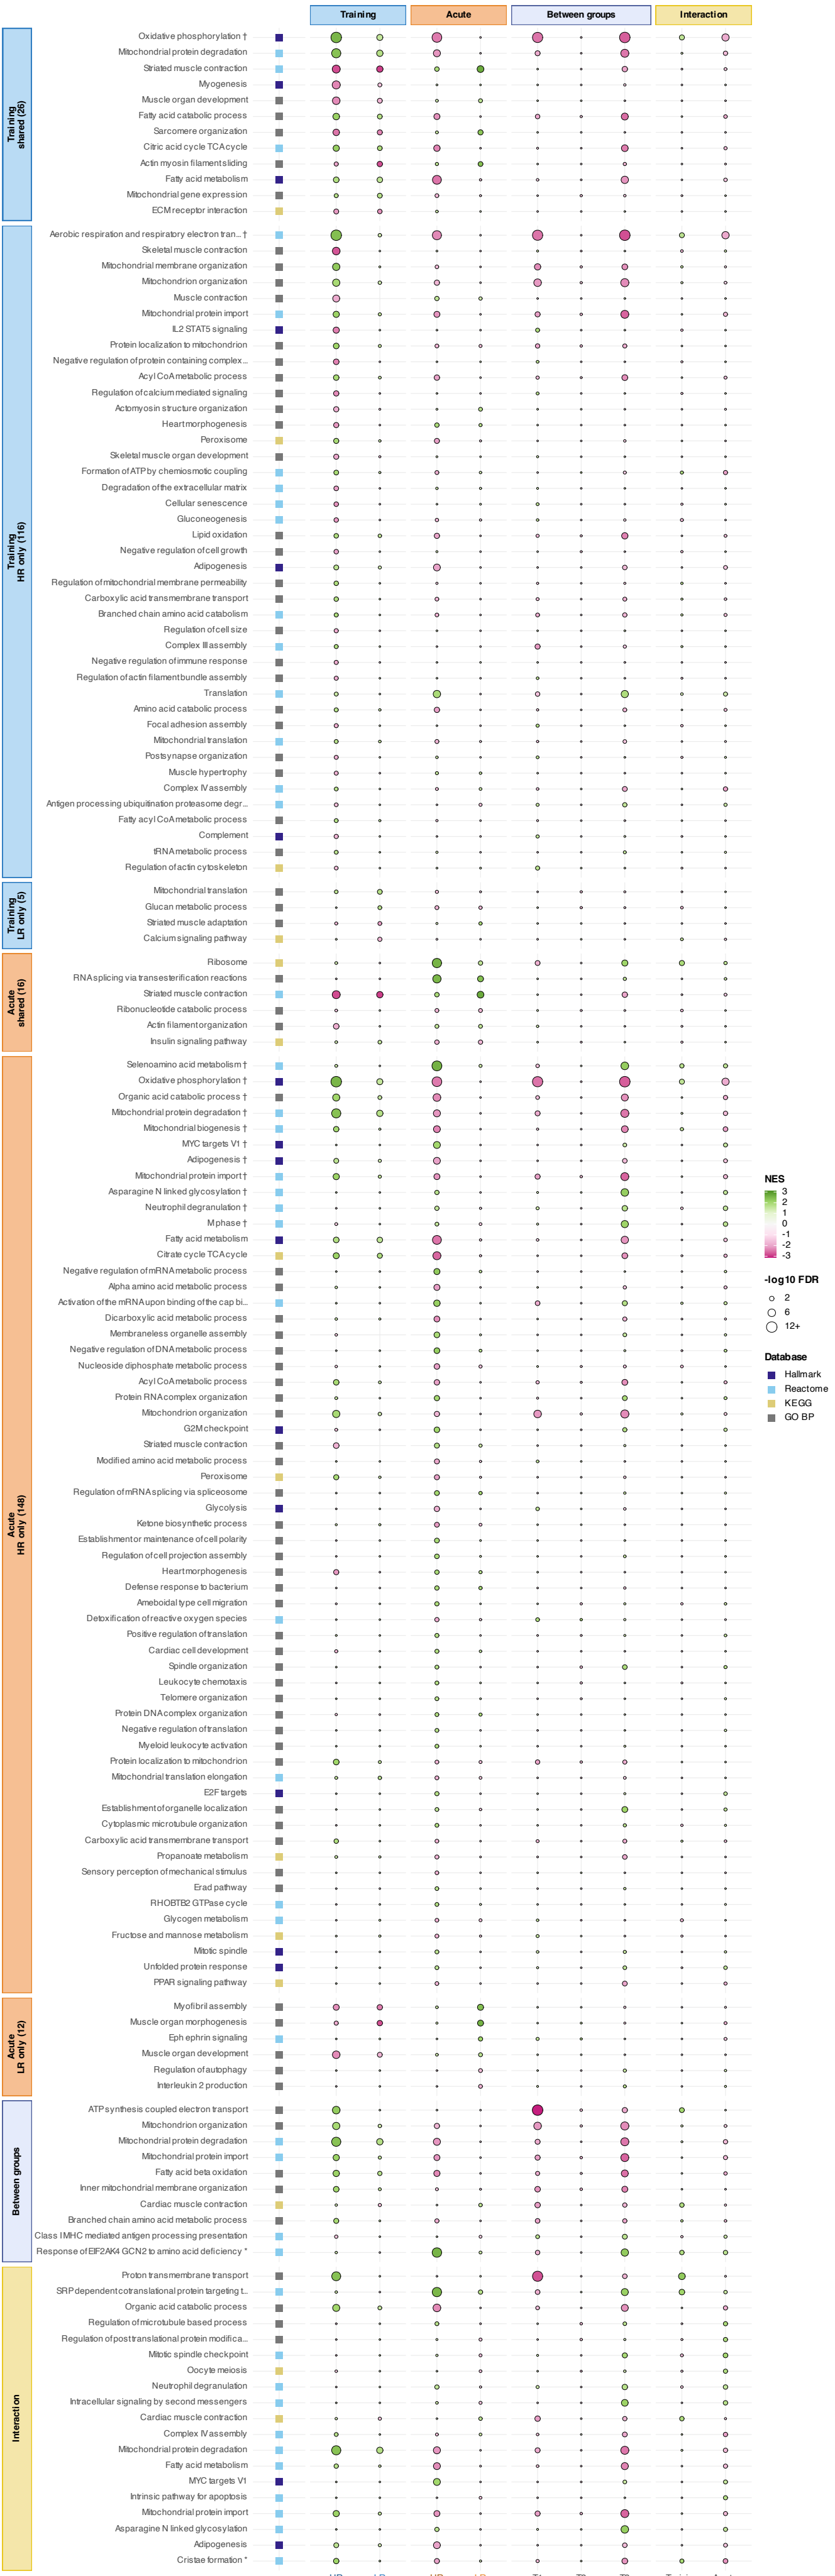

b Every candidate set, grouped by tree

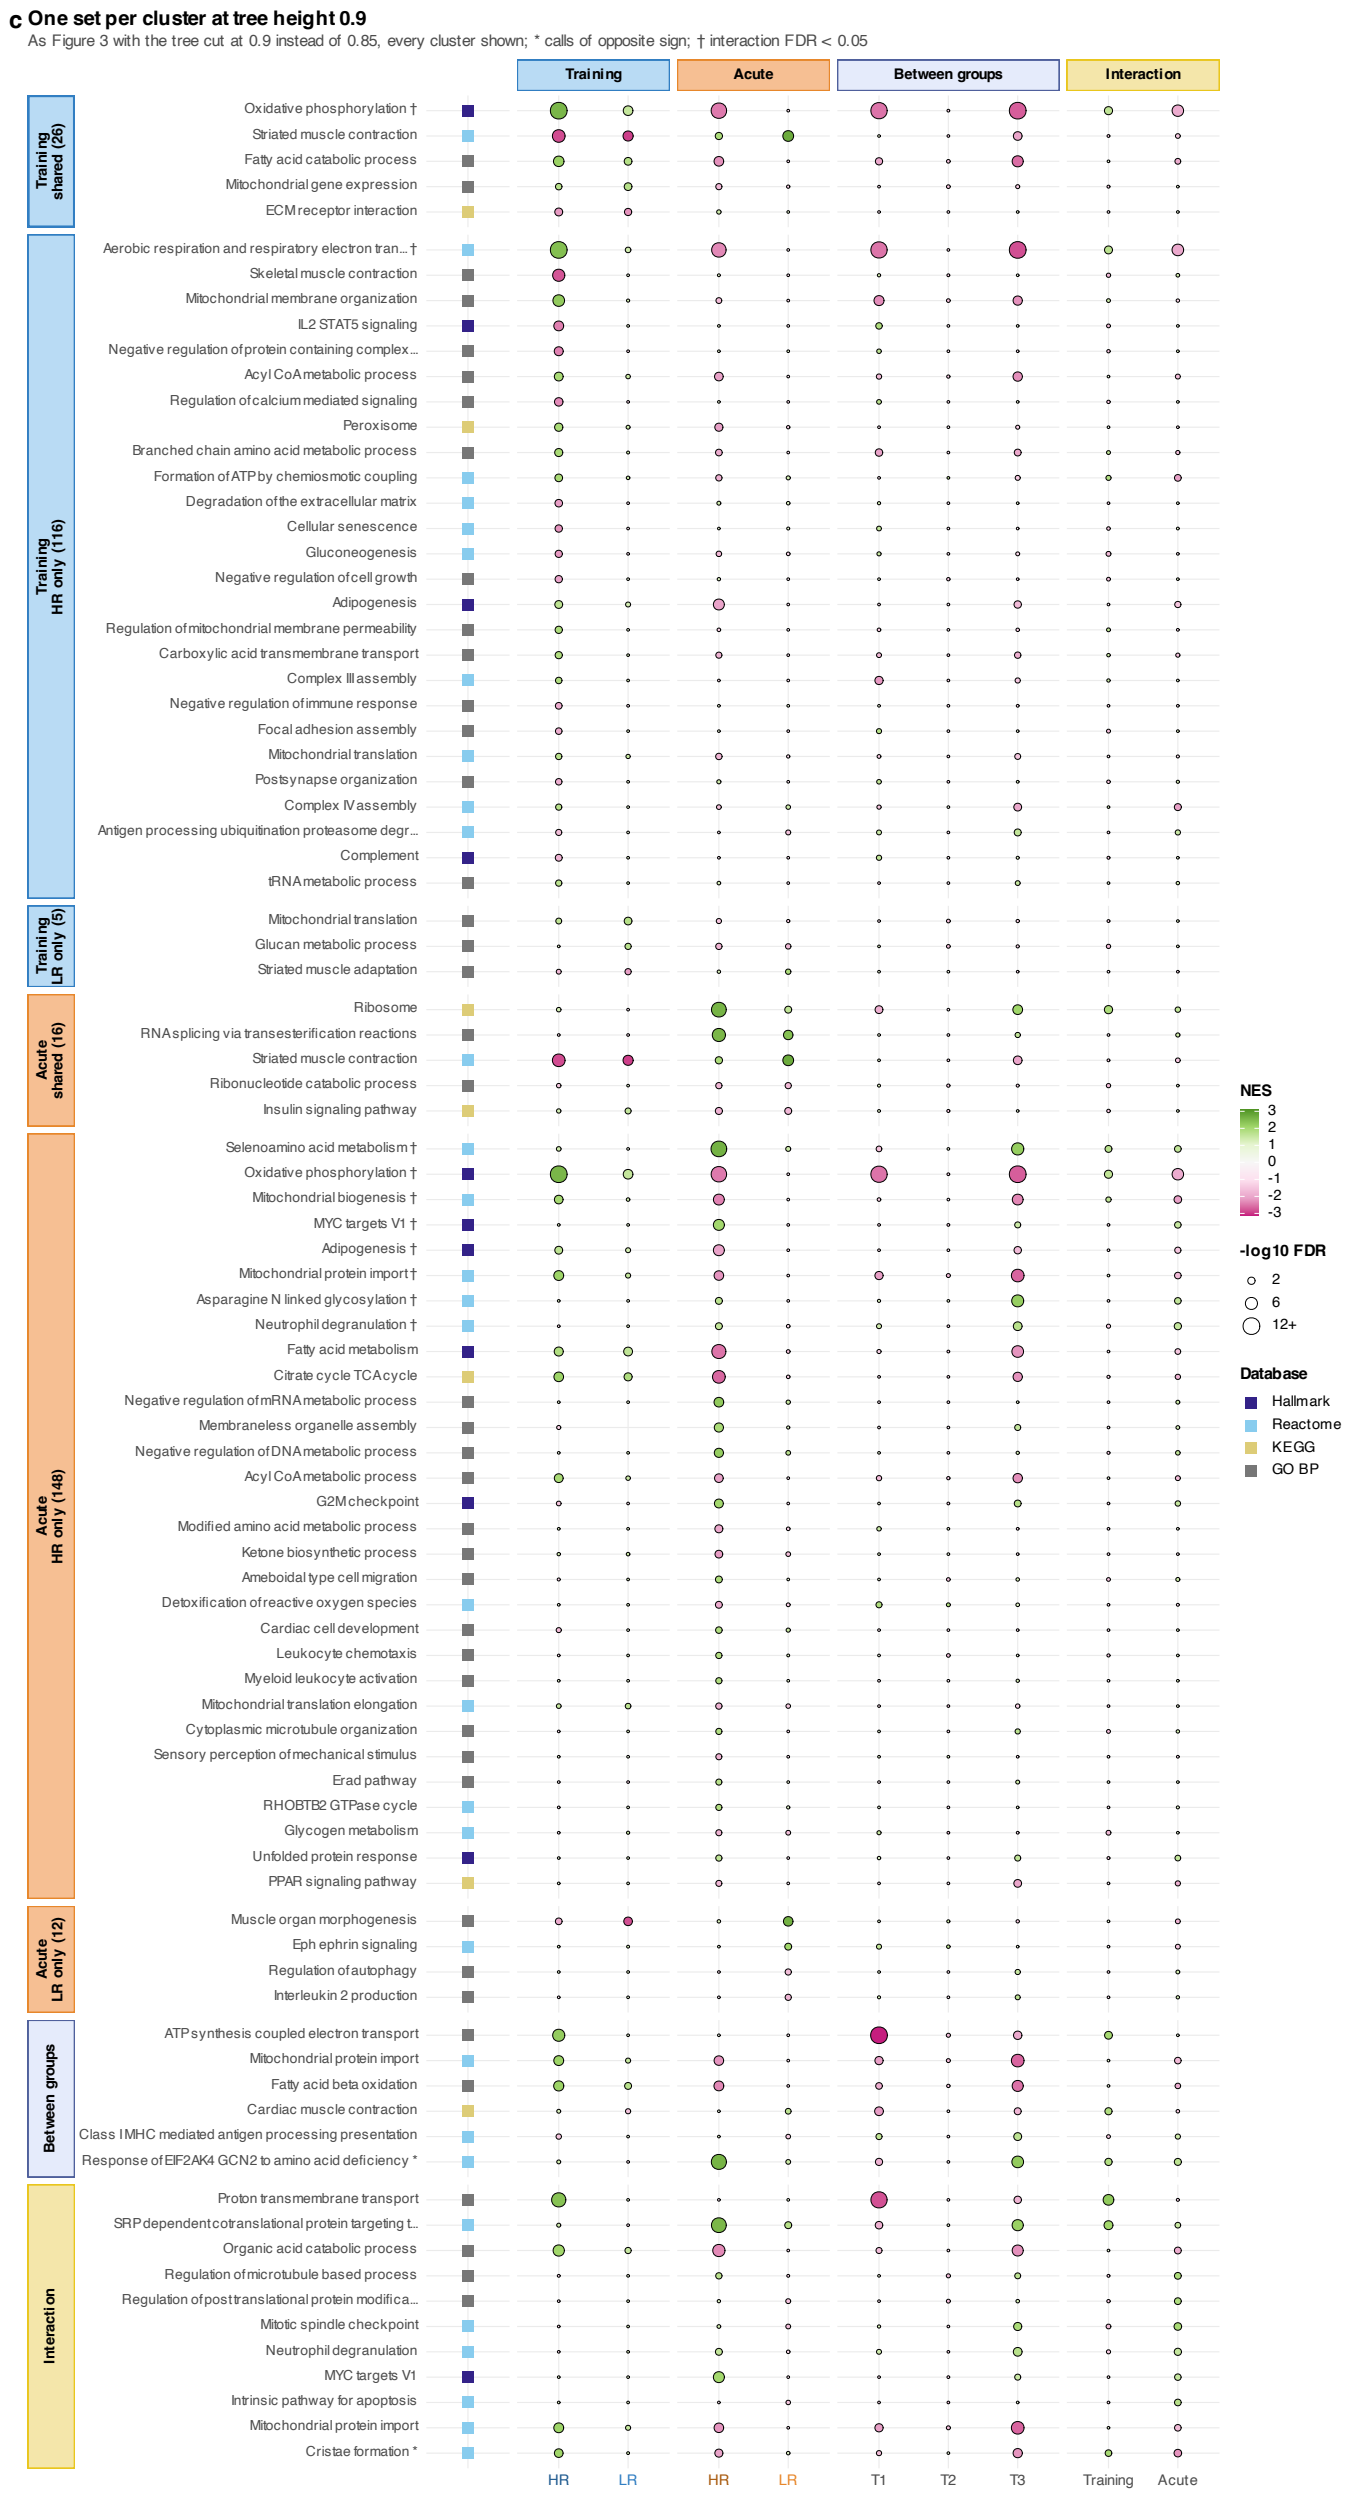

Only a leaf order of each tree is shown (ward.D2 clustering, Jaccard, average linkage). Sands alternate between clusters at height 0.85
