

F01 · Phenotype atlas: matched work, divergent growth

Matched training work; groups classified by growth magnitude; divergence by domain.

A

Training work performed

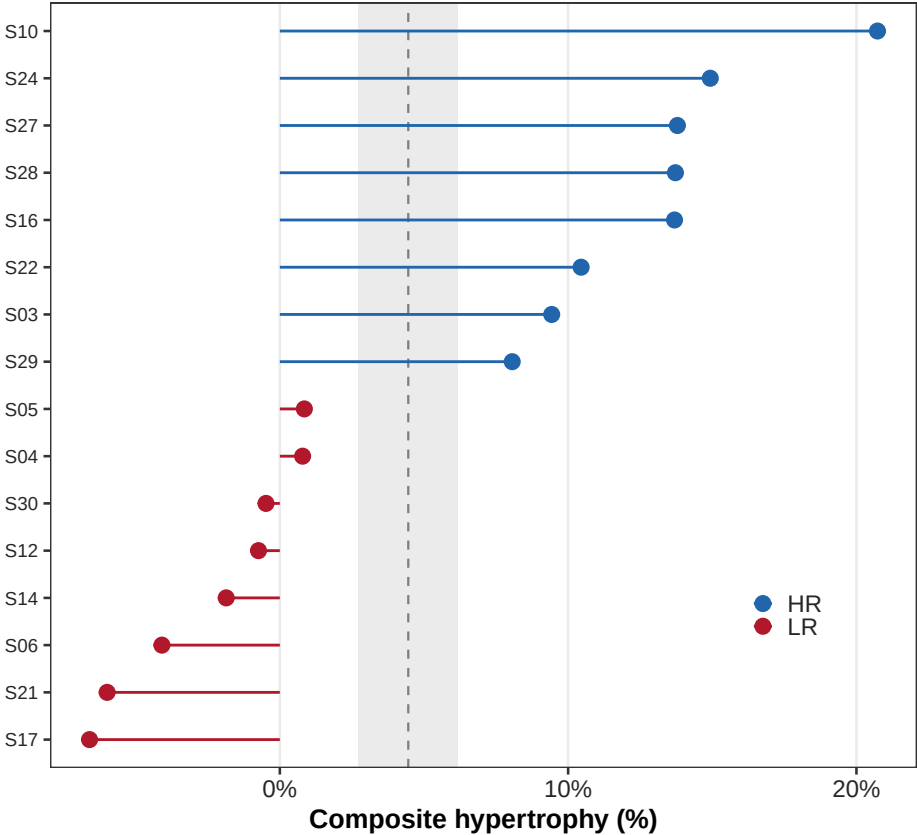

No detectable difference ($p = 0.64$; HR-LR 95% CI [-74,034, 47,259] kg)

B

The responder split, as a continuum

Per-subject composite %change; dashed = HR/LR split, grey = small-difference zone

C

Phenotype change by domain (change score)

HR-LR change in each measure's SD units (Hedges g); Holm-adjusted p
