

fgsea NES per contrast, 1370 sets, BH within contrast

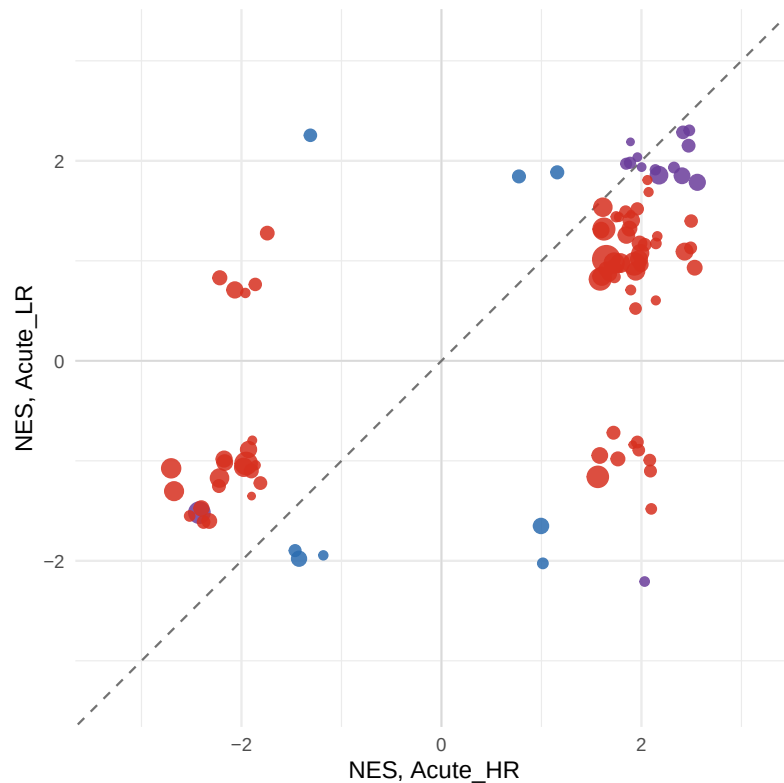

All collections

1370 sets | 287 significant | rho 0.35 | 53 discordant

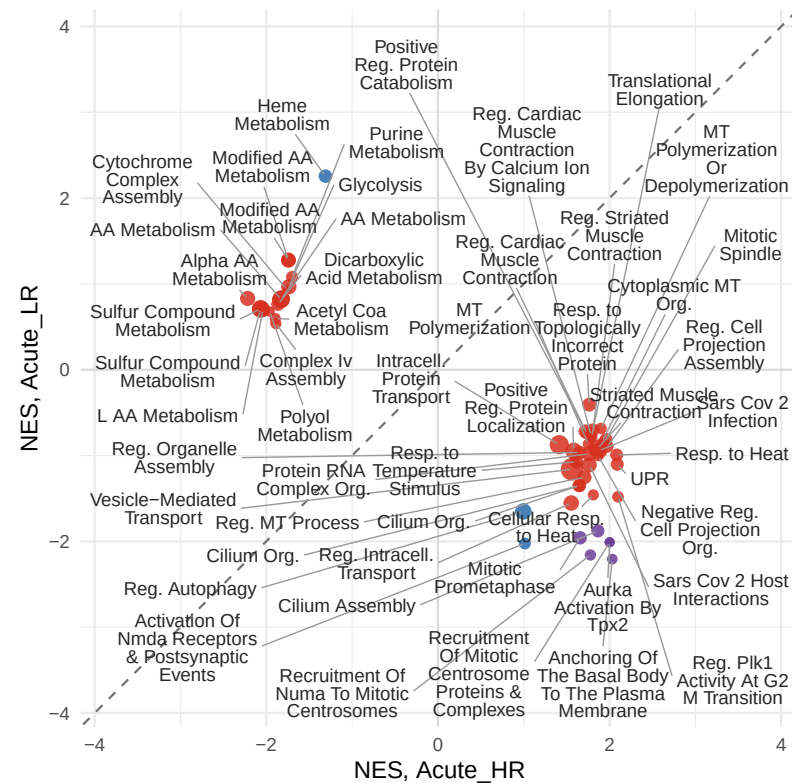

Collapse survivors

95 sets | 95 significant | rho 0.58 | 19 discordant

Discordant

53 sets | 53 significant | rho -0.60 | 53 discordant

genes ● 50 ● 150 ● 300 significant in ● Both ● Acute_HR ● Acute_LR

One point per gene set, scored in both acute contrasts. Dashed line is identity; grey points reach neither threshold. Discordant sets sit on opposite sides of zero and are significant in one arm only. Panel C rescales them. Table: `c_data/nes_scatter.csv`.
