

# P-value distribution per contrast

limma via proteoDA, 20 bins

Bars: proteins per p-value bin. Dashed line: the height of a flat null (tested / 20). Table: c\_data/02\_differential.xlsx, DEP\_matrix.

# Protein contrast hits (3/8)

limma via proteoDA, nominal p per contrast; 597 proteins nominal in at least one column; rows 151–225

# Protein contrast hits (4/8)

limma via proteoDA, nominal p per contrast; 597 proteins nominal in at least one column; rows 226–300

# Protein contrast hits (5/8)

limma via proteoDA, nominal p per contrast; 597 proteins nominal in at least one column; rows 301-375

Rows: proteins at nominal p < 0.05 in at least one column, most columns first, then by best p. Filled dot: nominal, fill = log2 FC, size = -log10 p. Black ring: BH < 0.05. Grey speck: tested, not nominal. Table: c\_data/02\_differential.xlsx, DEP\_matr

# Protein contrast hits (6/8)

limma via proteoDA, nominal p per contrast; 597 proteins nominal in at least one column; rows 376–450

Rows: proteins at nominal p < 0.05 in at least one column, most columns first, then by best p. Filled dot: nominal, fill = log2 FC, size = -log10 p. Black ring: BH < 0.05. Grey speck: tested, not nominal. Table: c\_data/02\_differential.xlsx, DEP\_matrix

# Protein contrast hits (7/8)

limma via proteoDA, nominal p per contrast; 597 proteins nominal in at least one column; rows 451–525

Rows: proteins at nominal  $p < 0.05$  in at least one column, most columns first, then by best  $p$ . Filled dot: nominal, fill =  $\log_2 FC$ , size =  $-\log_{10} p$ . Black ring: BH  $< 0.05$ . Grey speck: tested, not nominal. Table: c\_data/02\_differential.xlsx, DEP\_mat

# Protein contrast hits (8/8)

limma via proteoDA, nominal p per contrast; 597 proteins nominal in at least one column; rows 526–597

# Protein classification hits (3/6)

pROC AUC, Wilcoxon p per task; 419 proteins nominal in at least one column; rows 151-225

Rows: proteins at nominal  $p < 0.05$  in at least one column, most columns first, then by best p. Filled dot: nominal, fill = AUC, size =  $-\log_{10} p$ . Black ring: BH < 0.05. Grey speck: tested, not nominal. Table: c\_data/02\_differential.xlsx, protein\_auc.

# Protein classification hits (4/6)

pROC AUC, Wilcoxon p per task; 419 proteins nominal in at least one column; rows 226-300

Rows: proteins at nominal  $p < 0.05$  in at least one column, most columns first, then by best p. Filled dot: nominal, fill = AUC, size =  $-\log_{10} p$ . Black ring: BH < 0.05. Grey speck: tested, not nominal. Table: c\_data/02\_differential.xlsx, protein\_auc.

Protein classification hits (5/6)  
 pROC AUC, Wilcoxon p per task; 419 proteins nominal in at least one column; rows 301–375
