

B Global Proteome State

PCA – groups overlap (PERMANOVA $p = 0.62$)

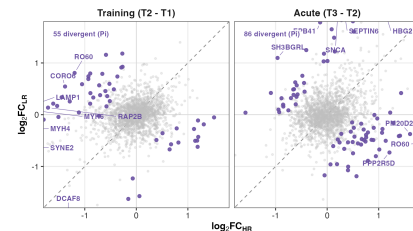

B Response Magnitude ...

RRPP – HR and LR move equally far

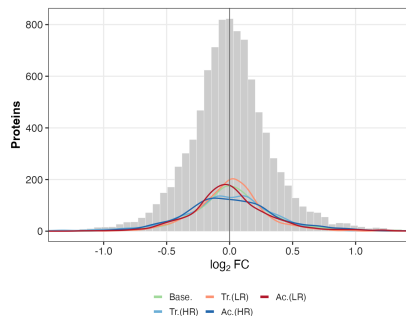

C Responder Divergence

HR vs LR logFC; interaction-significant labelled

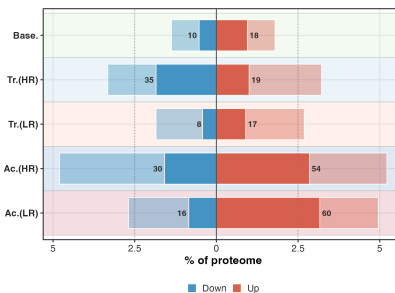

D Effect-Size Distribution

logFC per contrast

E DEPs per Contrast

% of proteome; dotted = chance

F Pathway Enrichment (GO)

non-redundant sets, BH < 0.05
