Training_Interaction

(HR_T2 − HR_T1) − (LR_T2 − LR_T1)

Protein significance: BH FDR < 0.05

NES

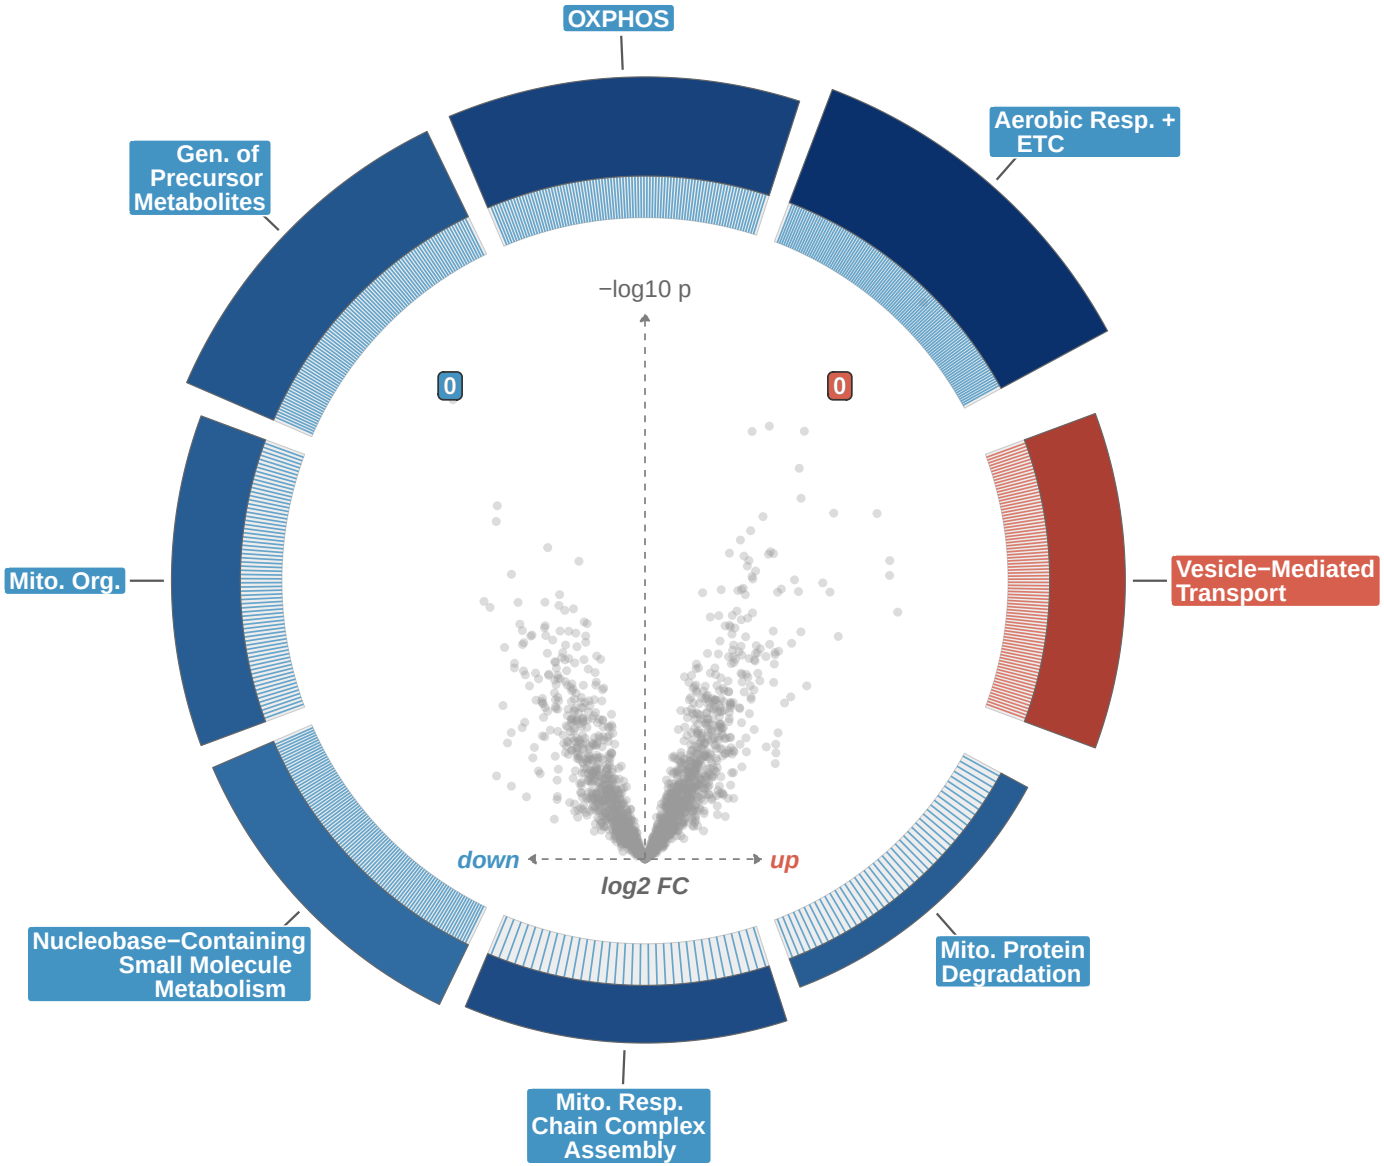

−3 −2 −1 0 1 2 3

Point colour: protein BH FDR < 0.05. Ring: up to eight fgsea sets at FDR < 0.05 that survived collapsePathways, ticks on their leading−edge proteins. Table: c_data/s01_volcano.xlsx.

Acute_Interaction

(HR_T3 − HR_T2) − (LR_T3 − LR_T2)

Protein significance: BH FDR < 0.05

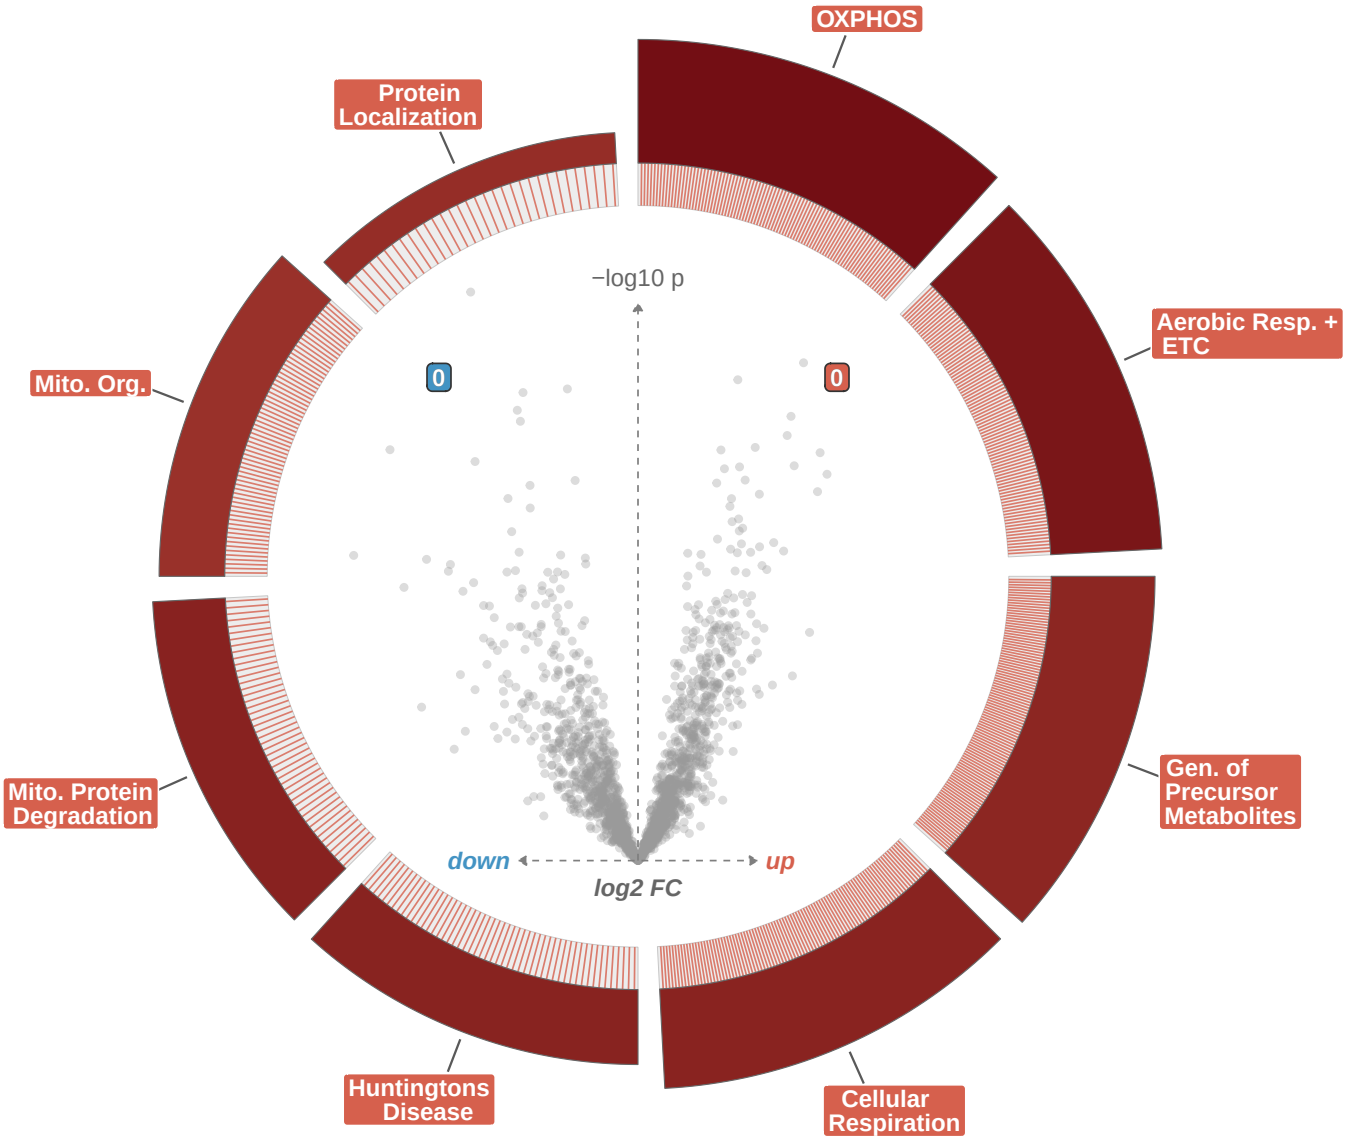

NES

−3 −2 −1 0 1 2 3

Point colour: protein BH FDR < 0.05. Ring: up to eight fgsea sets at FDR < 0.05 that survived collapsePathways, ticks on their leading−edge proteins. Table: c_data/s01_volcano.xlsx.

Training_HR

Protein significance: BH FDR < 0.05

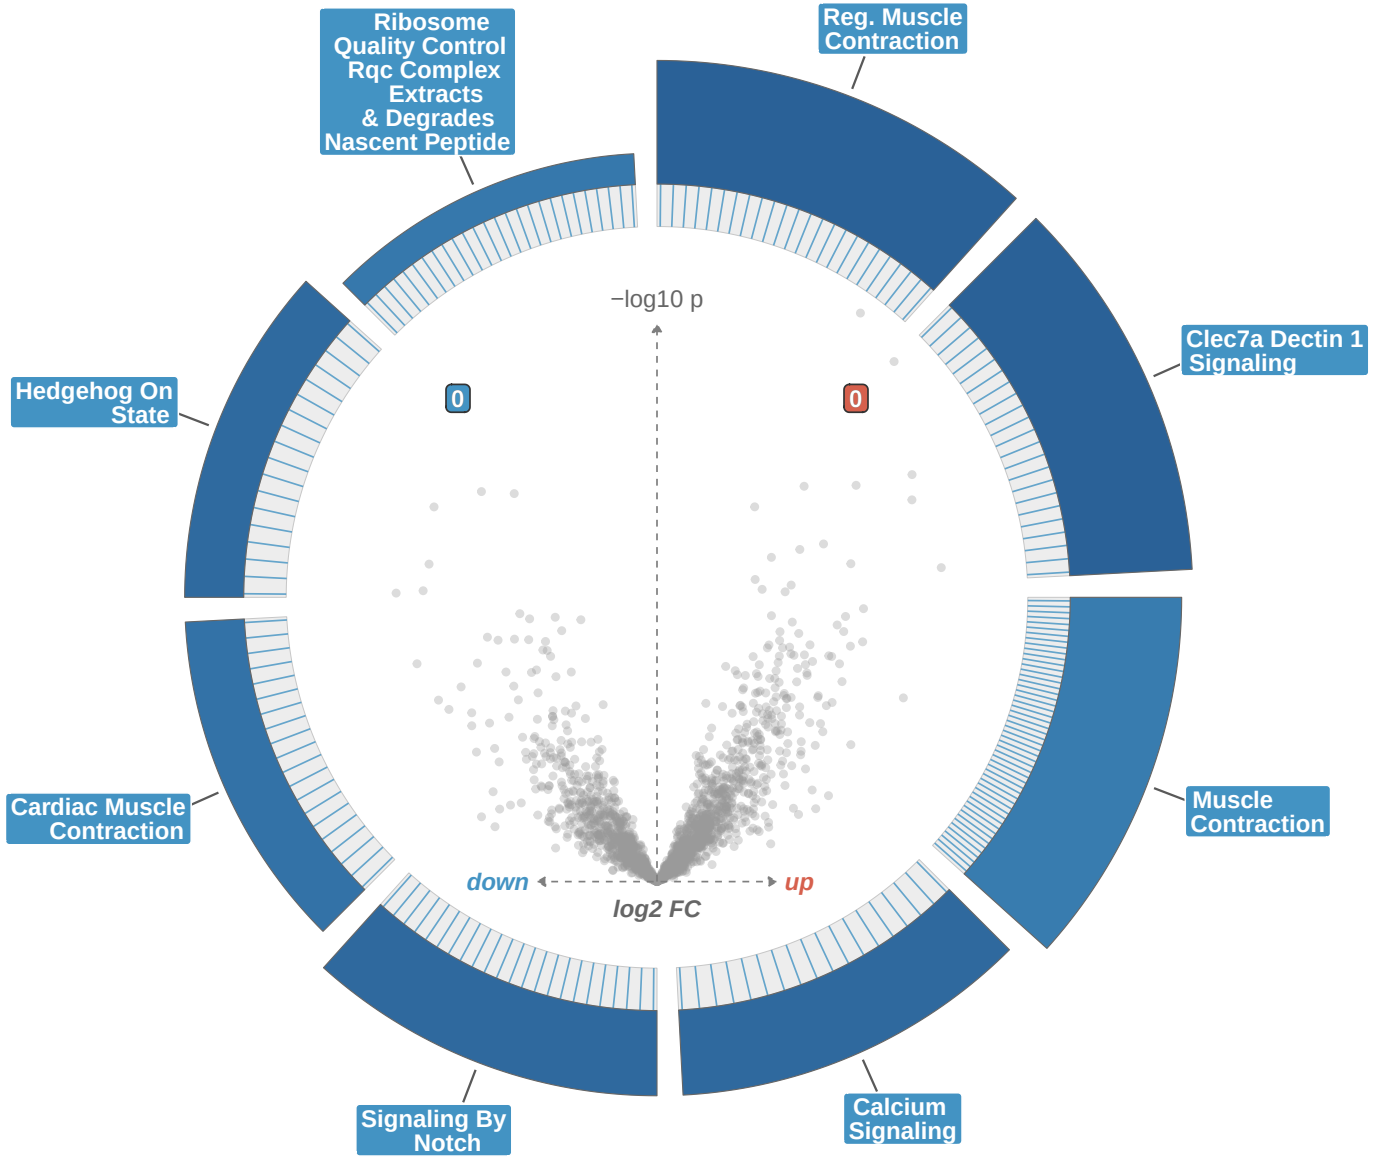

NES

−3 −2 −1 0 1 2 3

Point colour: protein BH FDR < 0.05. Ring: up to eight fgsea sets at FDR < 0.05 that survived collapsePathways, ticks on their leading−edge proteins. Table: c_data/s01_volcano.xlsx.

Training_LR

Protein significance: BH FDR < 0.05

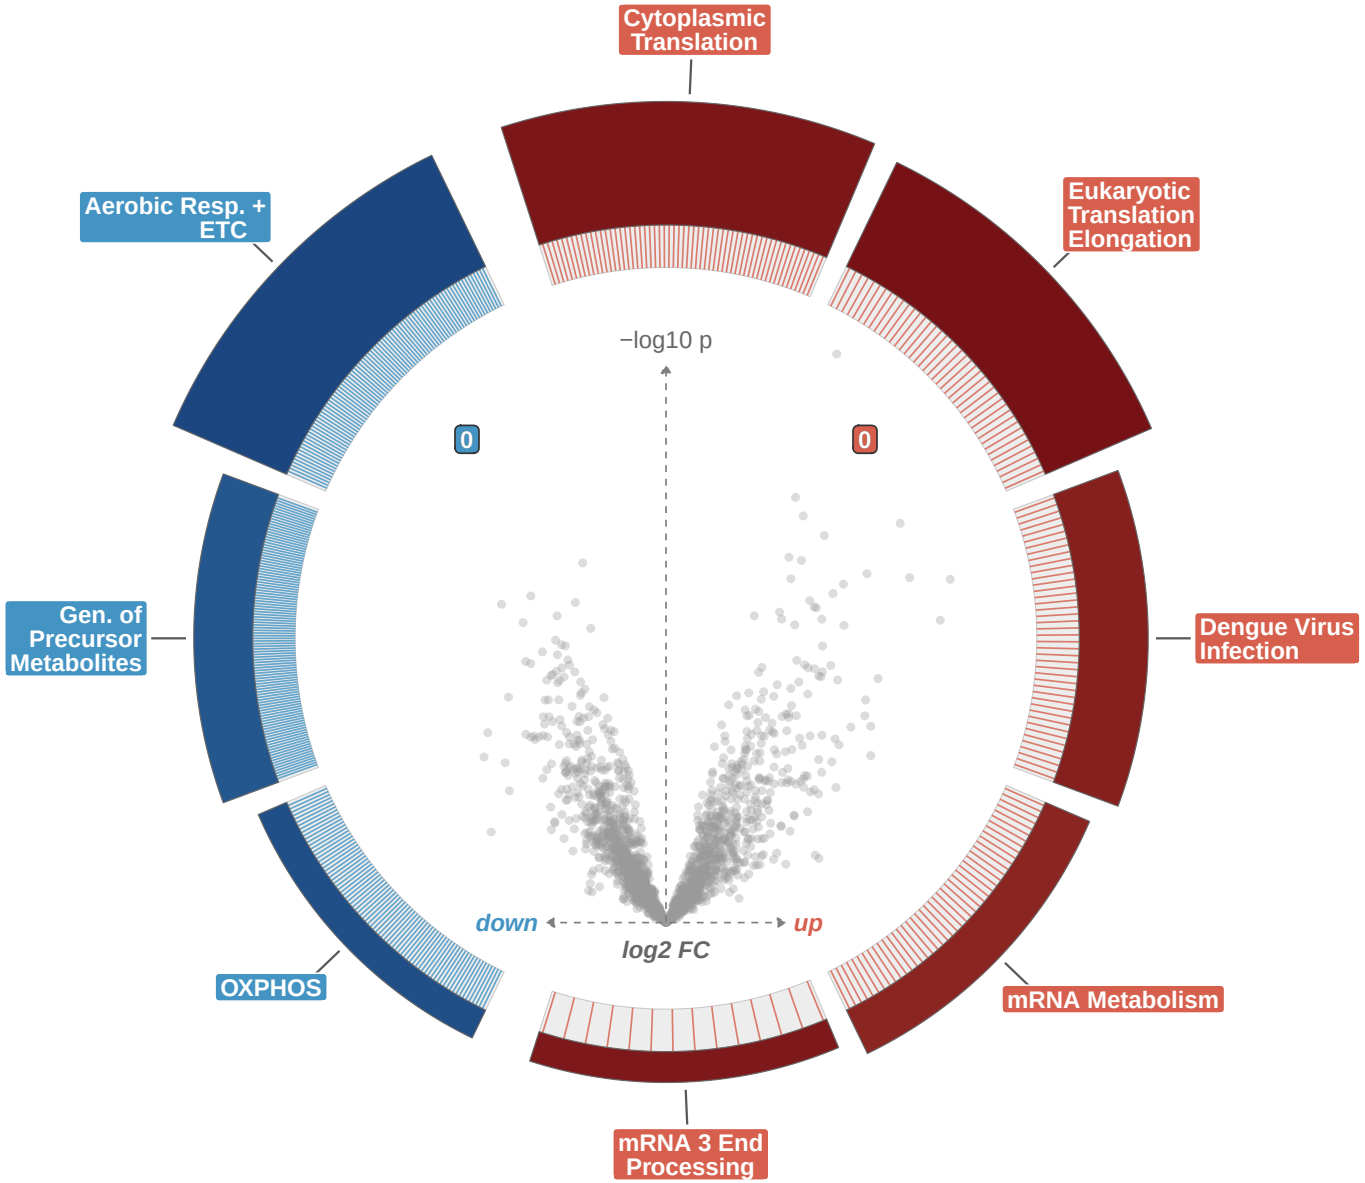

NES

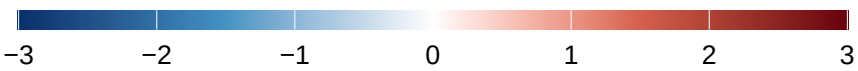

−3 −2 −1 0 1 2 3

Point colour: protein BH FDR < 0.05. Ring: up to eight fgsea sets at FDR < 0.05 that survived collapsePathways, ticks on their leading−edge proteins. Table: c_data/s01_volcano.xlsx.

Acute_HR

Protein significance: BH FDR < 0.05

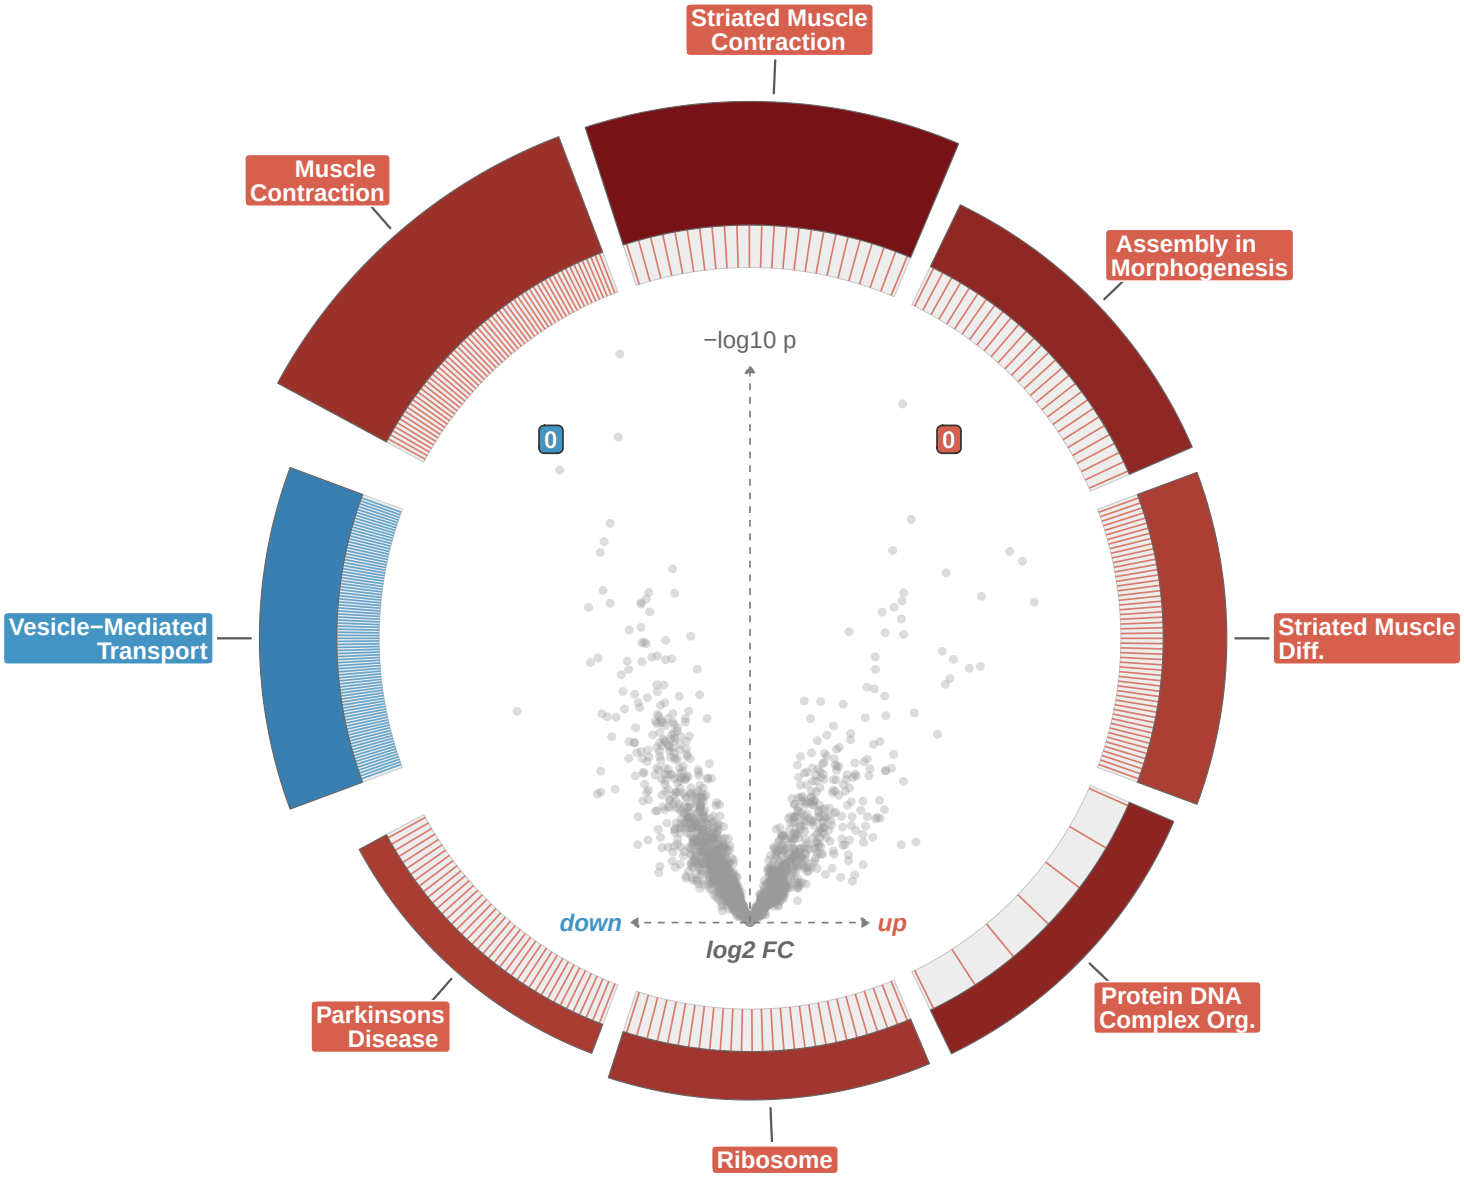

Point colour: protein BH FDR < 0.05. Ring: up to eight fgsea sets at FDR < 0.05 that survived collapsePathways, ticks on their leading−edge proteins. Table: c_data/s01_volcano.xlsx.

Acute_LR

Protein significance: BH FDR < 0.05

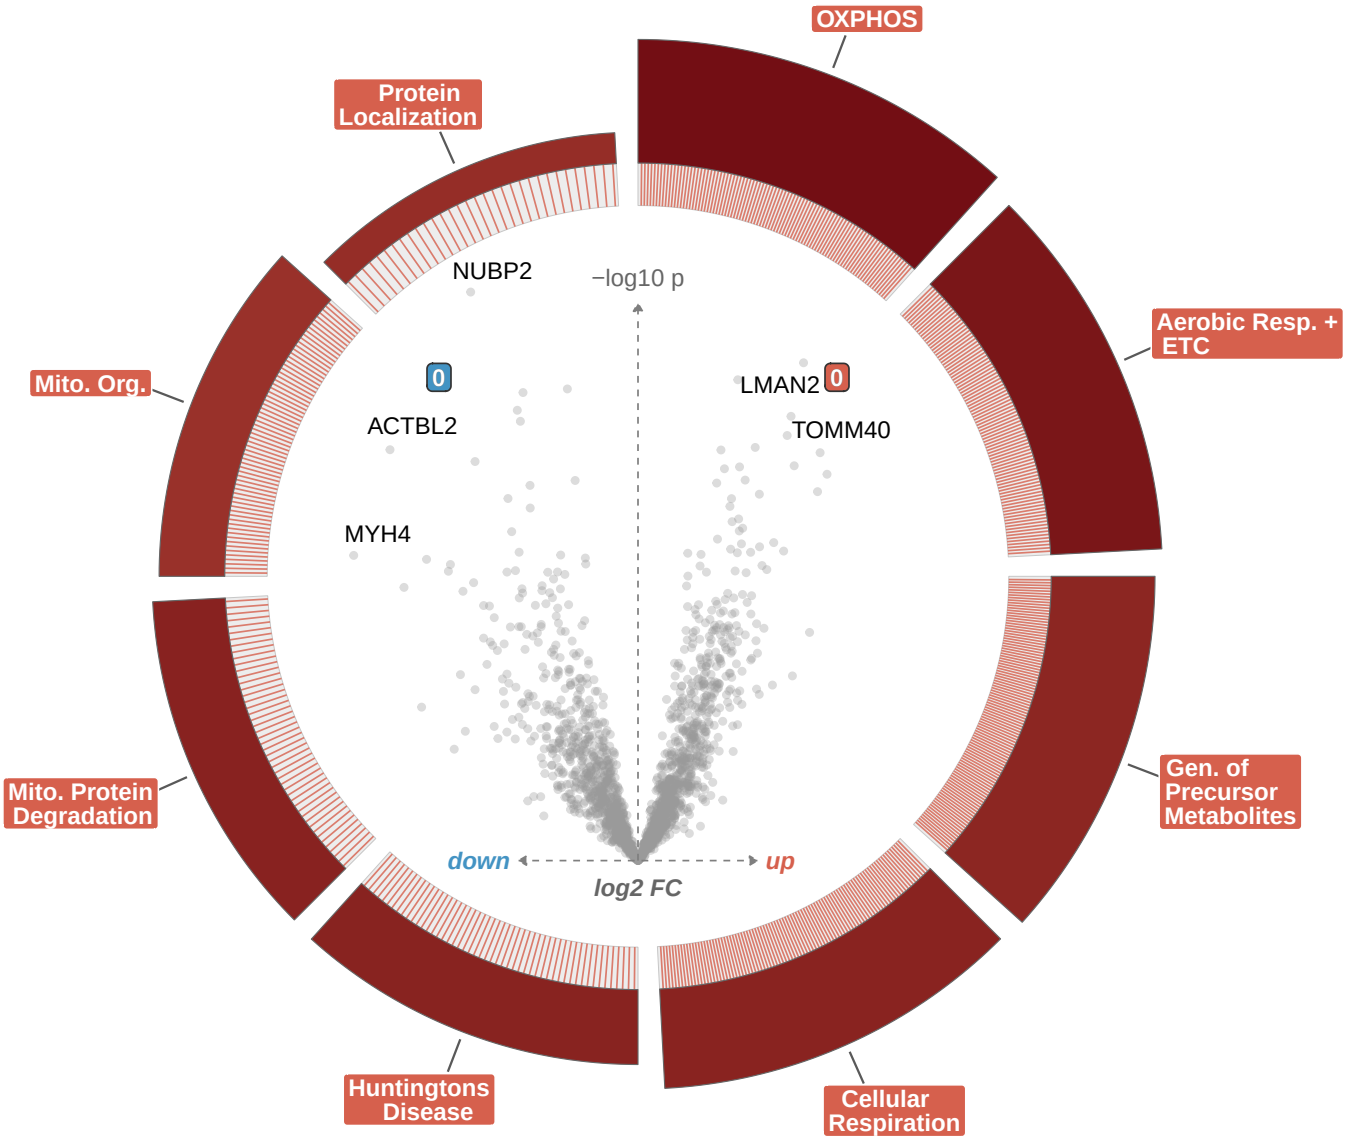

NES

−3 −2 −1 0 1 2 3

Point colour: protein BH FDR < 0.05. Ring: up to eight fgsea sets at FDR < 0.05 that survived collapsePathways, ticks on their leading−edge proteins. Table: c_data/s01_volcano.xlsx.

Training_HR

Labels ranked by pi−score; colours and counts use BH FDR

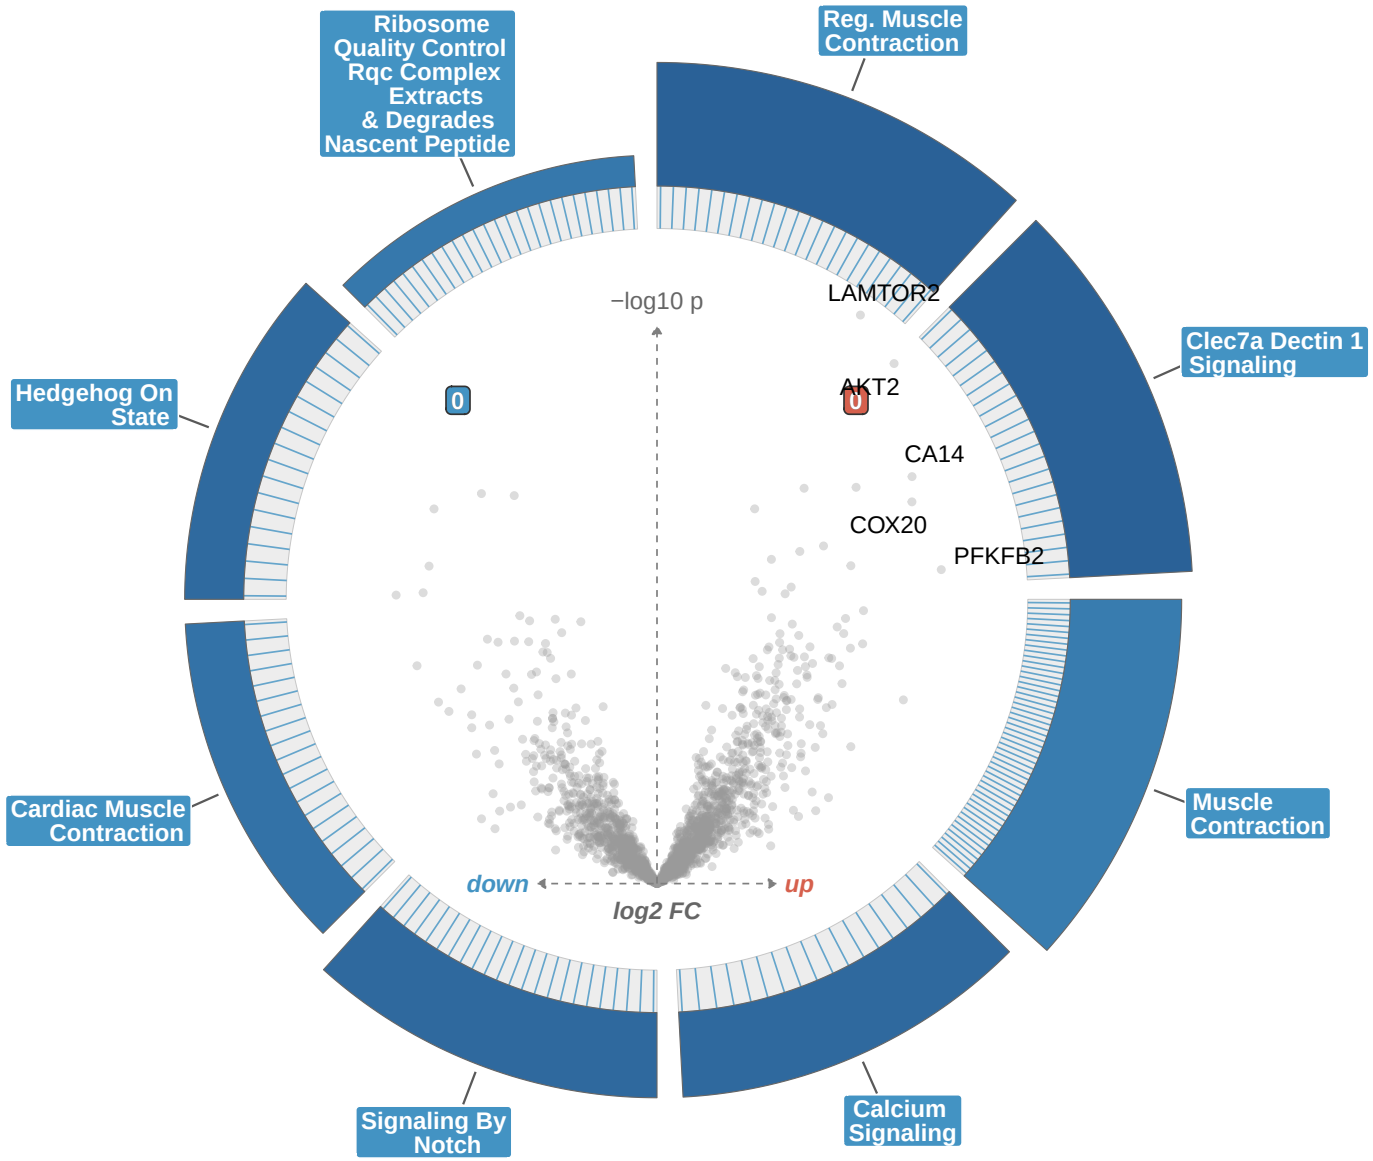

NES

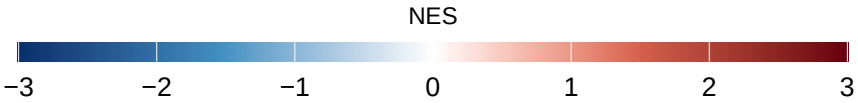

−3 −2 −1 0 1 2 3
