

F00 pilot: proteome response is modest and the responders move largely apart

Training (T1→T2) and acute (T2→T3), HR vs LR, non-imputed limma results

Response magnitude

Median $|\log\text{FC}|$ per protein; whisker to the 90th percentile

HR-LR concordance

Spearman ρ of per-protein $\log\text{FC}$, Fisher-z 95% CI
