

p-value distribution per contrast

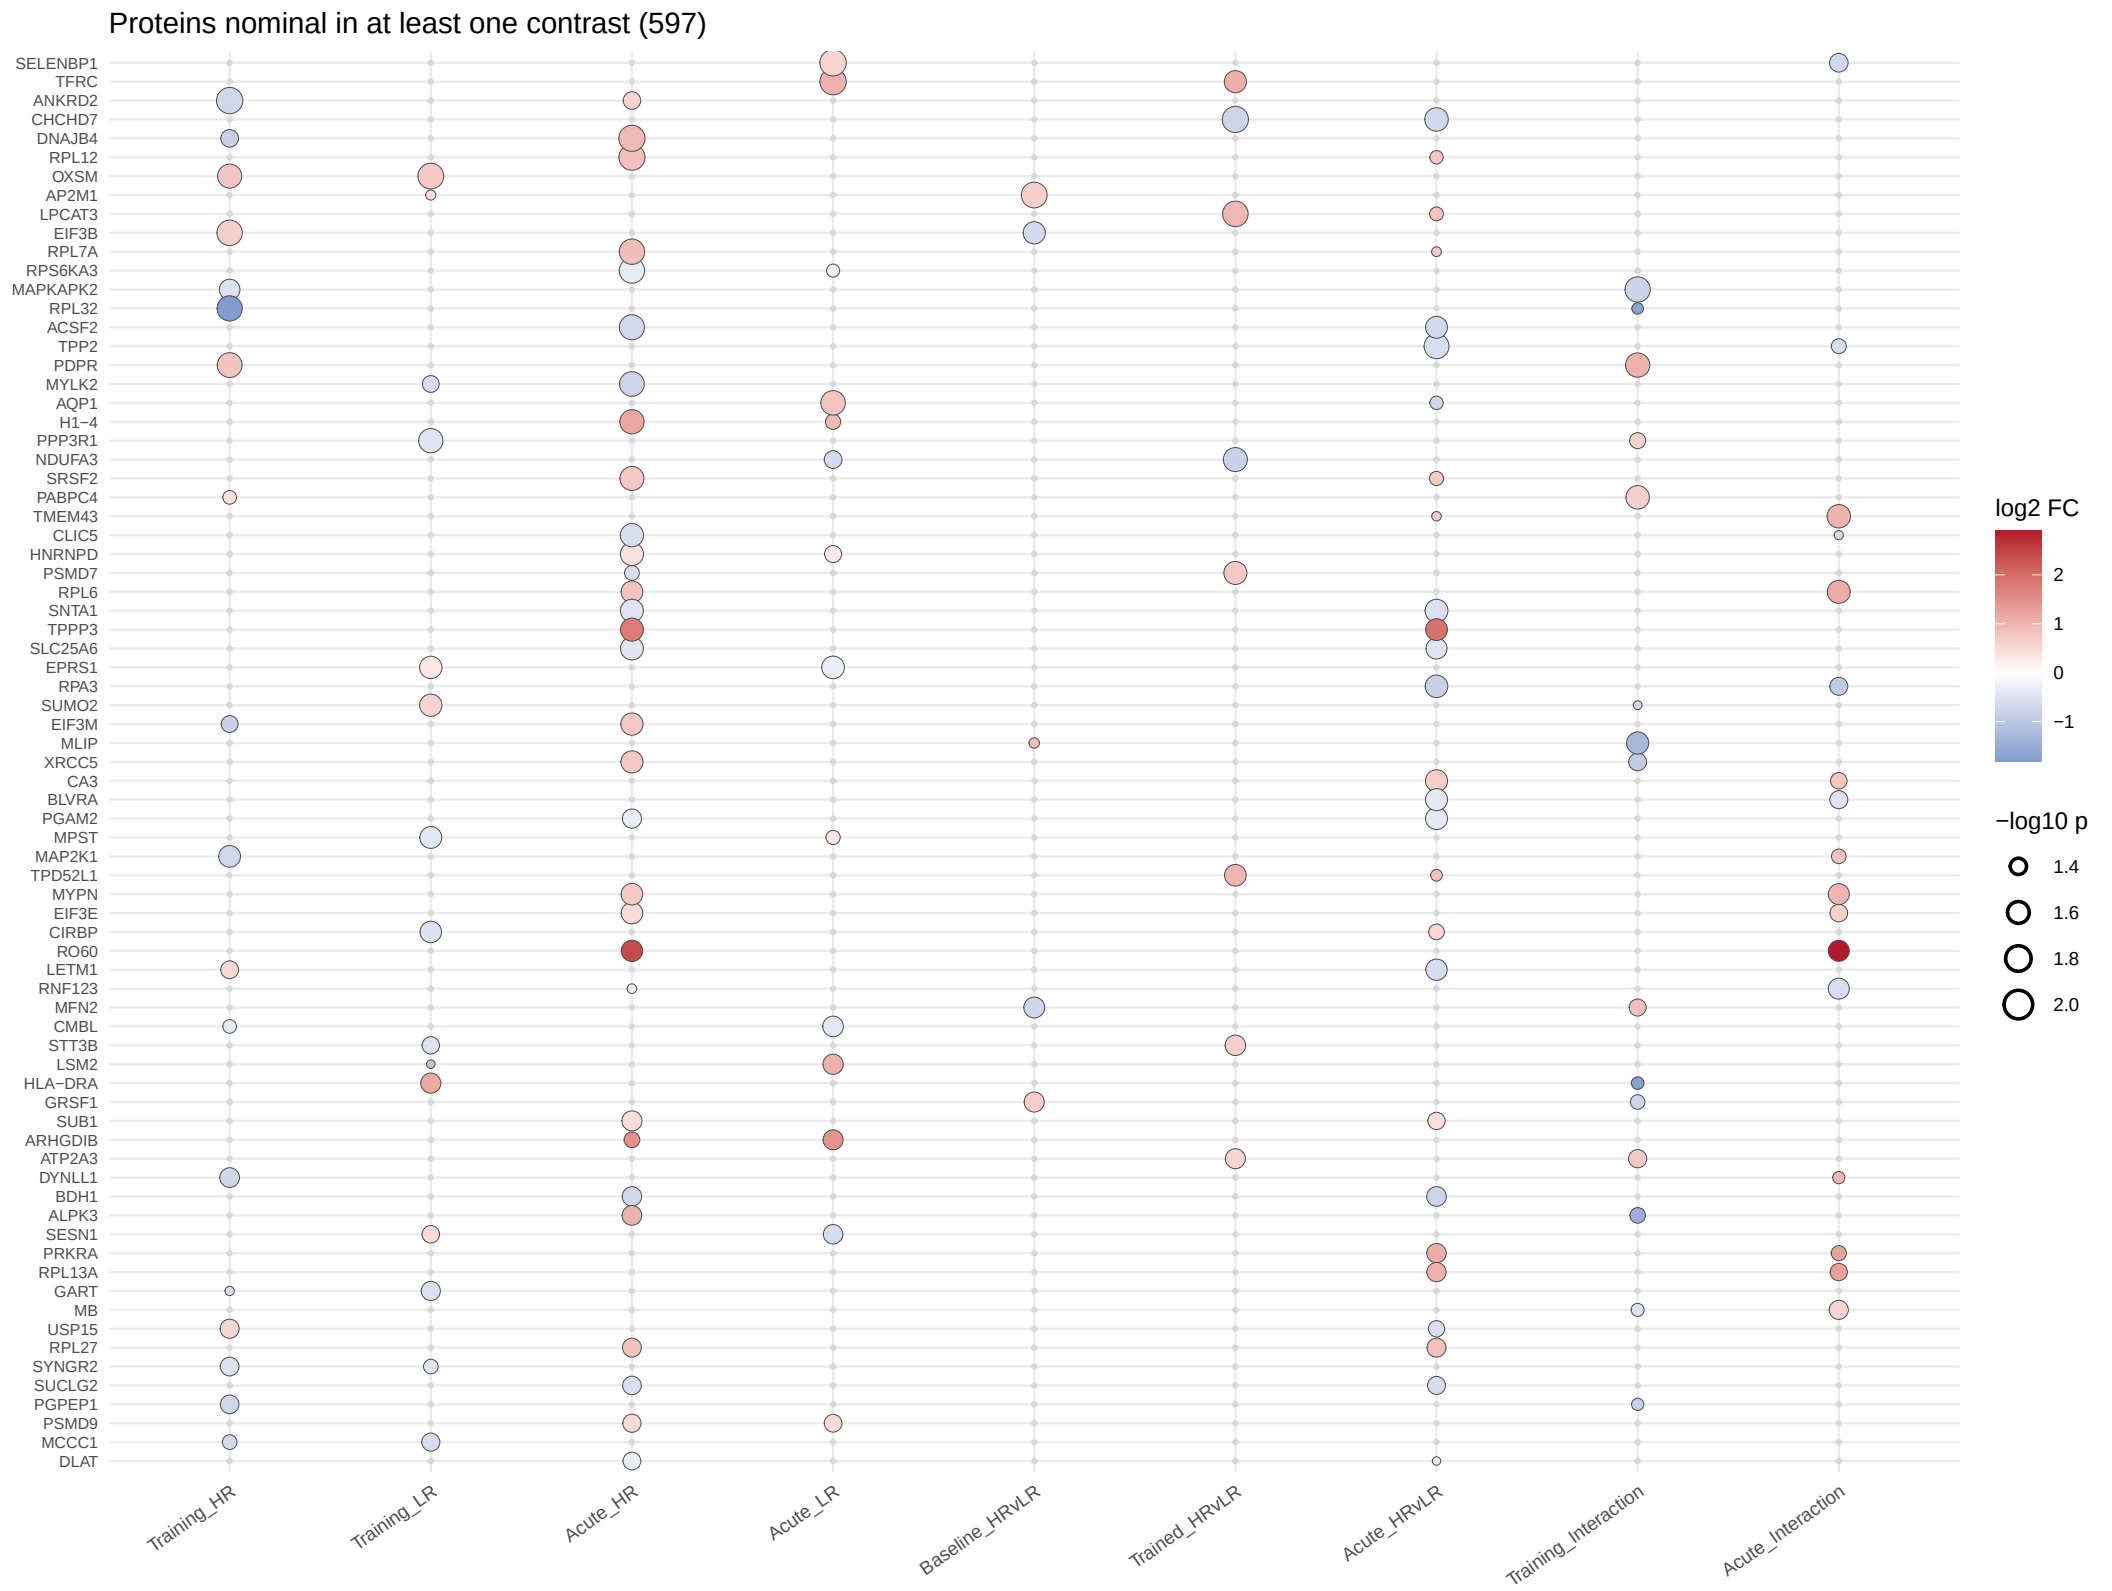

Dashed line: a flat null (tested / 20). A spike at zero on a flat background is signal; a slope up toward 1 is a conservative test. Table: c_data/02_contrasts.xlsx, DEP_matrix.

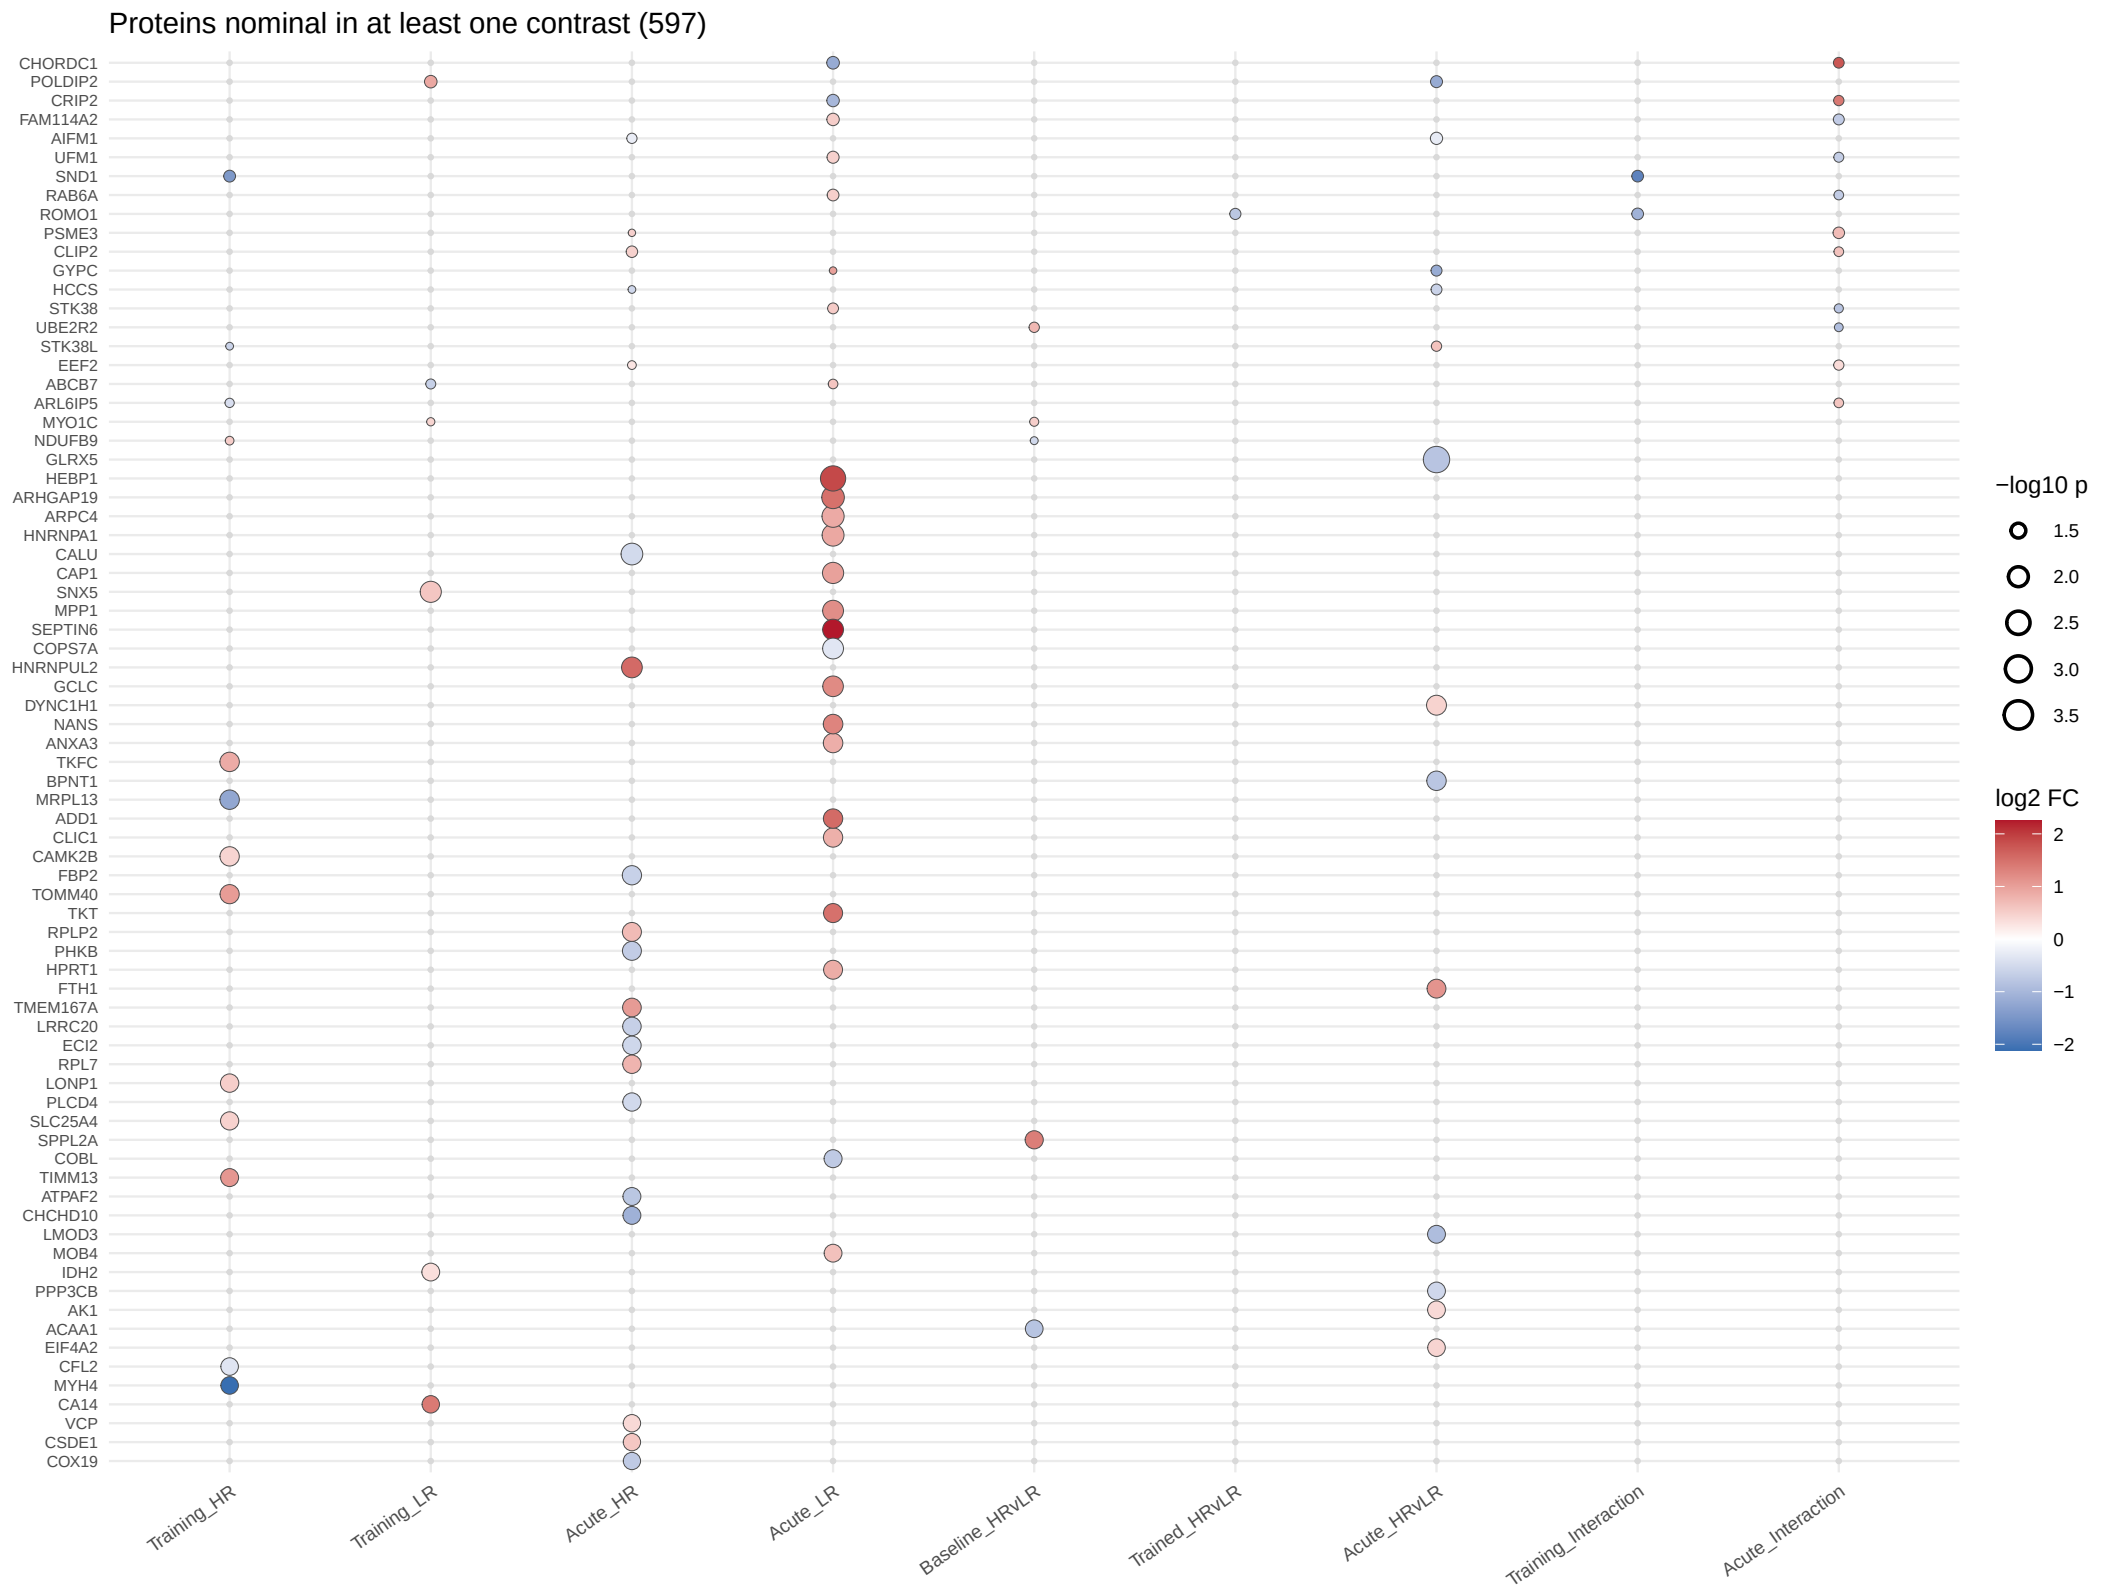

ws: proteins at $p < 0.05$ in at least one contrast, most contrasts first, then best p. Grey speck: tested, not nominal. Black ring: BH < 0.05 . Chance: 5% of tested per contrast (contrast_summary). Table: c_data/02_contrasts.xlsx, DEP_matrix.
