

Nominal associations against chance

Chance is 5% of modules tested per cell. Table: c_data/04_associate.xlsx, chance_expectation.

eigengene against fibres_mixed, between-person term

One line per subject from T1 to T2: within is the slope of the lines, between the spread of subjects

HR LR ○ T1 ● T2

greenyellow
between -0.000312 p 0.047 q 0.56

eigengene against leg_ext_1rm, between-person term

One line per subject from T1 to T2: within is the slope of the lines, between the spread of subjects

HR LR T1 T2

black
between 0.00239 p 0.042 q 0.46

eigengene against leg_ext_1rm, within-person term

One line per subject from T1 to T2: within is the slope of the lines, between the spread of subjects

HR LR T1 T2

green
within -0.0221 p 0.0073 q 0.087

turquoise
within 0.017 p 0.039 q 0.23

eigengene against mcsa, between-person term

One line per subject from T1 to T2: within is the slope of the lines, between the spread of subjects

HR LR T1 T2

eigengene against type1_share, within-person term

One line per subject from T1 to T2: within is the slope of the lines, between the spread of subjects

HR LR T1 T2

purple
within 0.0136 p 0.034 q 0.41

eigengene against phenotype, acute window

7 of 240 module-outcome pairs reach pooled $p < 0.05$; chance predicts 12. Header: pooled Spearman, q from BH within window and outcome. Corner: each arm's rho and exact p. Table: c_data/04_associate.xlsx, change_score and change_score_by_arm.

eigengene against phenotype, baseline window

13 of 240 module-outcome pairs reach pooled $p < 0.05$; chance predicts 12. Header: pooled Spearman, q from BH within window and outcome. Corner: each arm's rho and exact p. Table: c_data/04_associate.xlsx, change_score and change_score_by_arm.

eigengene against phenotype, baseline window

eigengene against phenotype, training window

HR LR

5 of 240 module–outcome pairs reach pooled $p < 0.05$; chance predicts 12. Header: pooled Spearman, q from BH within window and outcome. Corner: each arm's rho and exact p. Table: c_data/04_associate.xlsx, change_score and change_score_by_arm.
