Principal components against time point

Blood-corrected values, proteins scaled; R² of the covariate alone on each PC

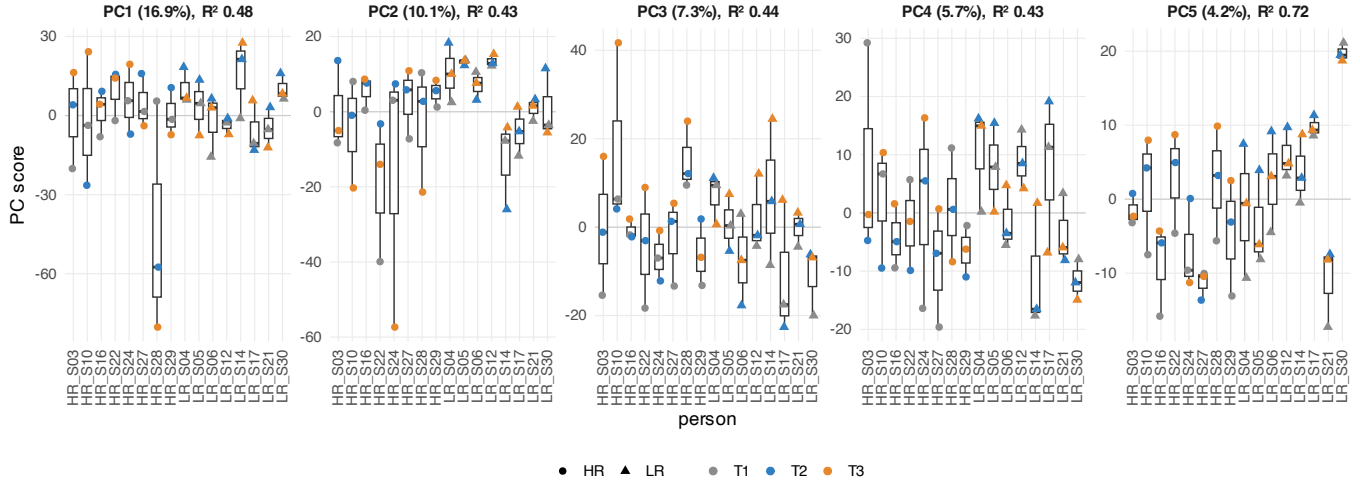

Principal components against HR/LR

Blood-corrected values, proteins scaled; R² of the covariate alone on each PC

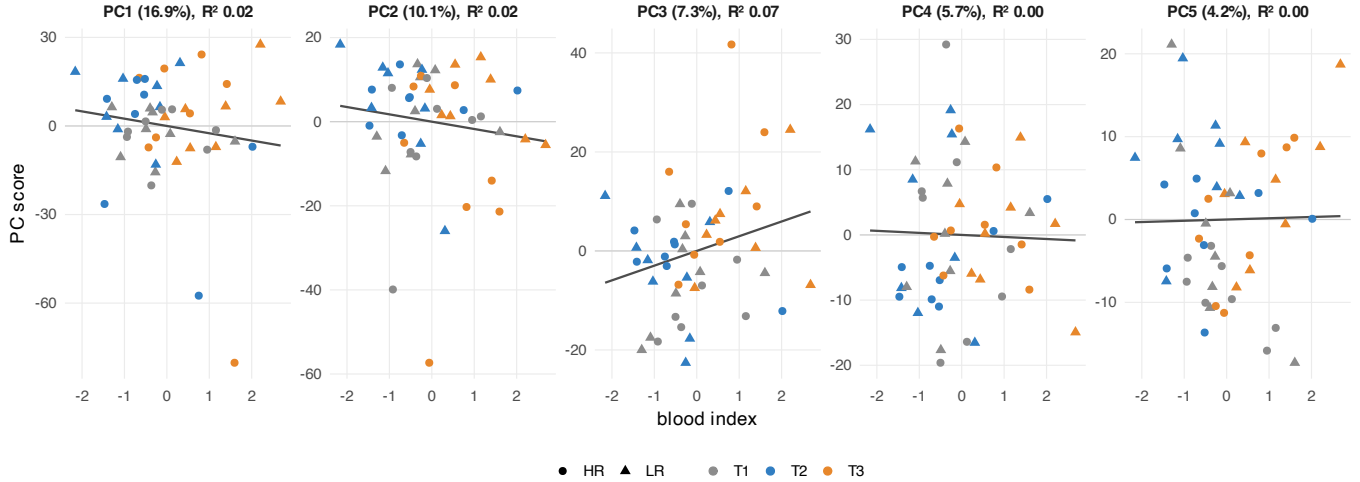

Principal components against person

Blood-corrected values, proteins scaled; R² of the covariate alone on each PC

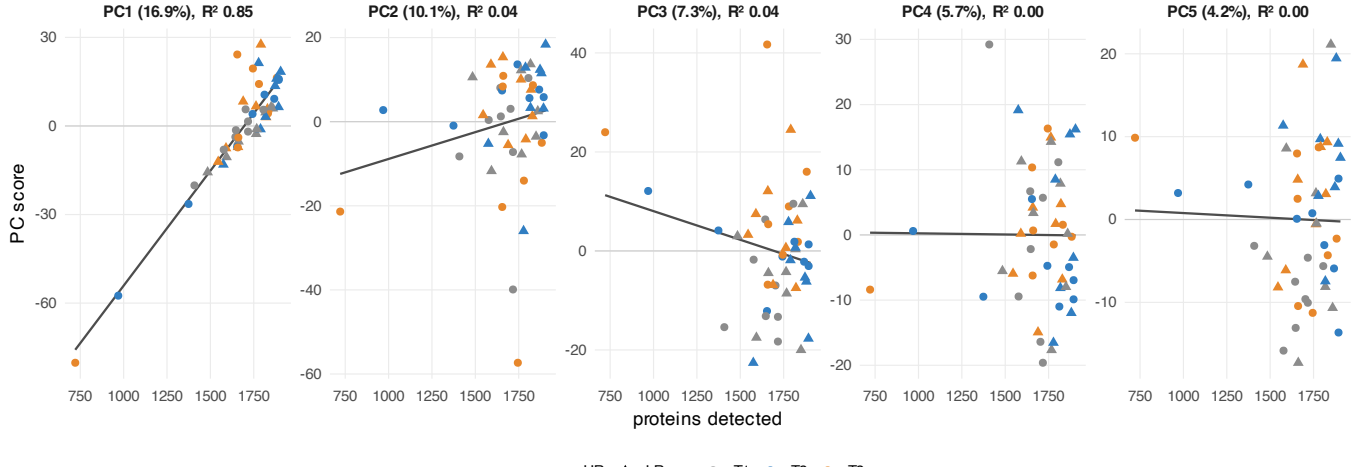

Principal components against blood index

Blood-corrected values, proteins scaled; R² of the covariate alone on each PC

Principal components against proteins detected

Blood-corrected values, proteins scaled; R² of the covariate alone on each PC

Principal components against sample weight

Blood-corrected values, proteins scaled; R² of the covariate alone on each PC
