

A

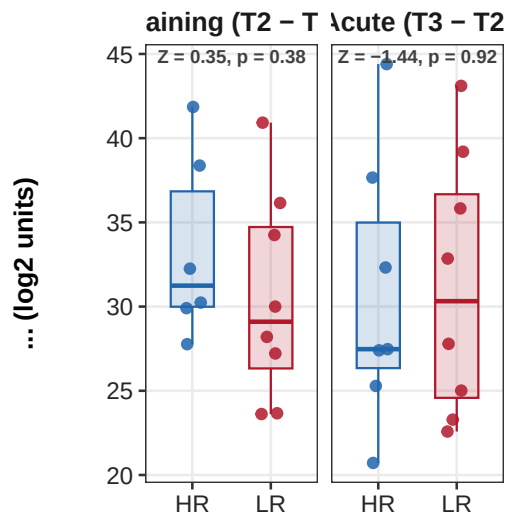

## Global Proteome State

PCA – groups overlap ( $p = 0.62$ )

B

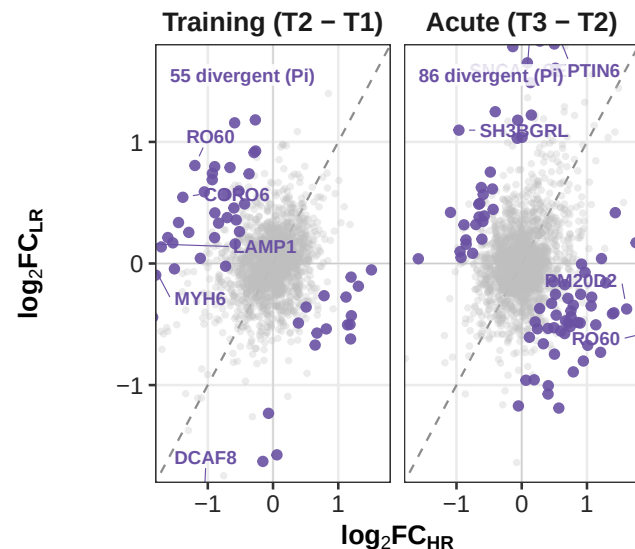

## Response Magnitude ...

RRPP – HR and LR move equally far

C

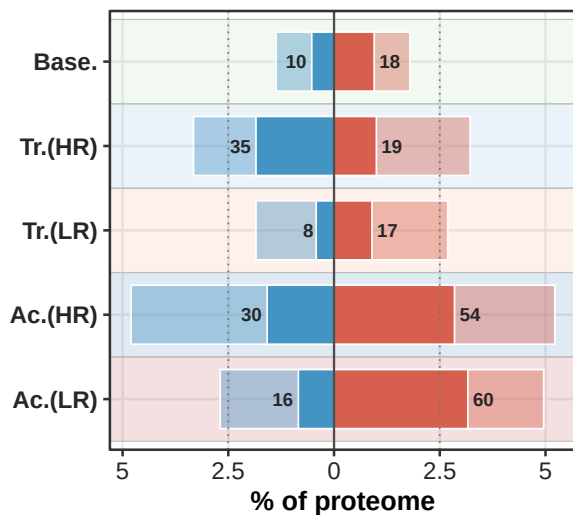

## Responder Divergence

HR vs LR log<sub>2</sub>FC; interaction–significant labelled

D

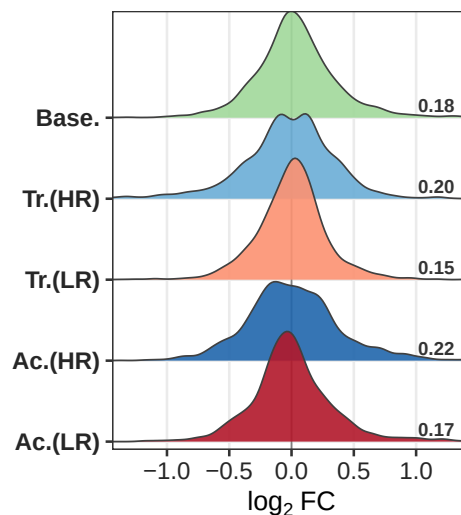

## DEPs per Contrast

% of proteome; dotted = chance

E

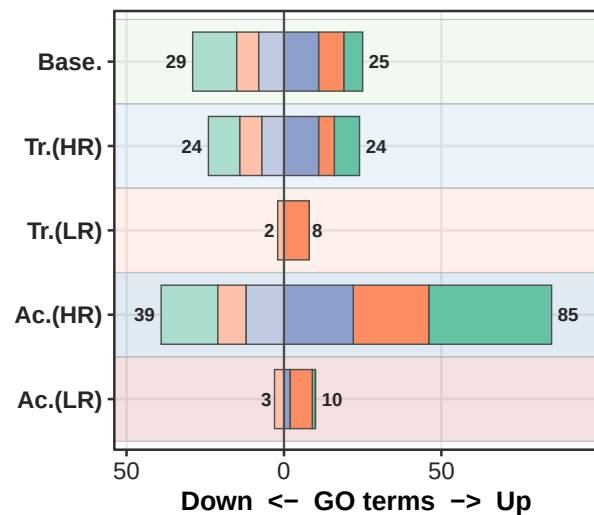

## Effect-Size Distribution

log<sub>2</sub>FC density per contrast

F

## Pathway Enrichment (GO)

non-redundant sets, BH &lt; 0.05
